Office Action Summary	Application No. 09/881,271	Applicant(s) KIM ET AL.	
	Examiner Dac V. Ha	Art Unit 2634	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. **Claims 1-27** are objected to because of the following informalities:

The recitation "DE_{out}" and "DEI" in all independent claims should be clearly defined when first mentioned.

Claim 1, line 18, "the transfer" should be changed to "transfer".

Claim 15, line 16, "the transfer" should be changed to "transfer".

Claim 17, line 26, "the transfer" should be changed to "transfer".

Claim 18, line 17, "the transfer" should be changed to "transfer".

Claim 22:

Line 8, "the transfer" should be changed to "transfer".

Line 6, "DEout" apparently should be "DE_{out}".

Claim 26, line 22, "the transfer" should be changed to "transfer".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. **Claims 22-25** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. **Claim 22** recites the limitation "the first input" in line 7. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 2634

5. **Claim 22** recites the limitation "the encoding" in line 11. There is insufficient antecedent basis for this limitation in the claim. That is, such "encoding" should be clearly defined to indicate which encoding process it is referring to (i.e., since there are two encoding steps preceding such recitation.

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

7. **Claim 22-25** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. No where in the specification or the drawings indicate connection of the claimed subject matter "the encoding performed using in-band and out-of-band characters" on lines 11-12 of claim 22 with the specification.

Allowable Subject Matter

8. Claims 1-27 are allowed.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ducaroir et al. (US 6,167,077) disclose Using Multiple High Speed Serial Lines To Transmit High Data Rates While Compensating For Overall Skew.

Art Unit: 2634

Ohki et al. (US 5,483,534) disclose Transmitting System Having Transmitting Paths With Low Transmitting Rates.
